ABSTRACT (STYLE OF THE PARAGRAPH: '<ABSTRACT'; 10PT, BOLD, ITALIC)

These Preparation Guidelines aim to give to potential participants the necessary information relevant for the Abstract submission to the 6th International Conference on Urban Planning 'ICUP 2027'. These Guidelines ought to be respected so that each Abstract submitted has a consistent appearance. This document itself is formatted according to the required Formatting-styles (names consist of symbol '<'). Since it is supplied as a Microsoft Word file, it can be used as a proper template. We, therefor, strongly suggest Authors to replace the content of this file with their own (preserving the existent page-setup/formatting and no adding any extra line-spaces i.e. blank rows, except in the case of usage 'Page-breaking Rules'). To facilitate and simplify the formatting of abstract, it is also possible to paste the complete content from another source/document, and then format it by simple selecting the titles, text, captions, etc., and then clicking the appropriate Style from the Styles gallery, at the Home tab (top ribbon). Text should not exceed 250 words.

Keywords: *urban planning; international conference; preparation guidelines; abstract formatting; general information*
